

OMD Clinical Administrative Policy Patient Definition

Approved 1/15/20,
Effective 4/1/20; replaces 10/1/13 & all prior versions

Patient Definition

The definition of a patient is any human being that:

- a) Has a complaint suggestive of potential illness or injury.
- b) Requests evaluation for potential illness or injury.
- c) Has obvious evidence of illness or injury.
- d) Has experienced an acute event that could reasonably lead to illness or injury.
